Art Unit: 3712

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 1-3 are rejected under 35 U.S.C. 102(b) as being anticipated by Kaplan et al. The claimed removable plug panel reads on segment 44. With respect to claim 3, front cover (13, 26) and back cover (14, 32) are secured together by the shrink wrap taught in column 3 at the second full paragraph thereof.

3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

4. Claims 5 and 6 are rejected under 35 U.S.C. 102(b) as anticipated by or, in the alternative, under 35 U.S.C. 103(a) as obvious over Kaplan et al. The claimed score line reads on the line left after removing segment 44 (the line along which the cut was made to afford removal of segment 44) and/or the lines defining slots 38. It defines a product securing area as claimed, inasmuch as some product is inherently capable of being secured in the area defined by the line.

In the event any of the lines identified above are not considered score lines, it would have been obvious to provide score lines at the same locations identified in order to provide a convenient method of shaping pocket portion 32 as disclosed.

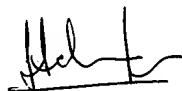

Art Unit: 3712

5. Claims 4 and 7 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.
